

In Area D sewer lines would have to be installed in Glenwood Subdivision and some decision would have to be made about extending sewer lines down to the intersection of U. S. 74 and Hospital Road. Water would have to be in Glenwood Subdivision and the lines of Hamlet Water Company that serve the shopping center and hospital purchased, or additional lines installed.

Decisions on the complete details of all utilities to be installed may have to wait until some decision is made in regard to the County utility system.

Cost for providing water-sewer mains in Area C was established at \$215,000; of providing sewer mains in Area D at \$200,000 and of purchasing the water lines in Area C at \$19,000. These were prepared by the City's utility engineering consultants.
